› Visiting the Münster Graduate School of Evolution (MGSE) as an ETT-Fellow

What is the MGSE?

The MGSE is an interdisciplinary Graduate School bridging the faculties of:

Biology | Medicine | Geosciences | Philosophy | Mathematics

While investigating topics like the evolution of the earth, rapid adaptations, evolutionary medicine, and bioethics, MGSE scientists use the concept of „Evolution“ as a unifying conceptual framework.

What are ETT-Fellows?

ETT-Fellows are internationally outstanding scientists who visit the MGSE for 1 to 6 months and join with PIs of the MGSE to form the Evolution Think Tank (ETT). During their stay the ETT-Fellows...

- ...interact with the doctoral students and participate in their supervision.
- ...participate in workshops or „Theme groups“ (series of meetings with a specific evolutionary topic), which can result e.g. in review papers.
- ...cooperate with doctoral students and PIs on interdisciplinary projects.
- ...give talks during the yearly Symposium or one of the MGSE lecture series.

In close interaction with the doctoral students, the ETT will establish mechanisms for the transfer and application of evolutionary knowledge.

What is provided for the Fellows?

The MGSE will provide funding for travel expenses, accomodation, a monthly stipend of up to 1000 € to cover extra expenses, and an office in the Kavaliershäuschen, a nice building just opposite the Residence of Münster.

How to apply?

ETT-Fellowships are designed for experienced postdoctoral and senior researchers. ETT-Fellows will be invited by the MGSE Steering Committee upon suggestion by MGSE members or after successful application. Applications and suggestions for Fellowships can be submitted at any time.
