# Research Integrity Code

Universidad del Desarrollo, to carry out its core functions, expects all researchers to adhere to the highest standards of ethical conduct in the planning, implementation, review and reporting of the results of academic research activities undertaken under the auspices of this institution.

The responsible scientific research and public trust in their results have been identified as key elements of the governance of science, technology and innovation (ST & I).  Researchers at the university are required to remain committed to promote and foster a culture of integrity in research, consistent with RI/RCR "Research Integrity and Responsible Conduct of Research".  All research will follow the http://www.singaporestatement.org/downloads/singpore%20statement_A4size.pdf Whereby, researchers will need to follow the fundamental principles: Honesty in all aspects of research, accountability in the conduct of research, professional courtesy and fairness in working with others and good stewardship of research on behalf of others.

Additionally, it is the responsibility of researchers to comply with the Montreal Statement on Research Integrity that cross national, institutional, disciplinary and sector boundaries. http://www.researchintegrity.org/Statements/Montreal%20Statement%20English.pdf

The university will foster a work environment that promotes integrity through clear policies based on international standards for the advancement of research.
