Faculty of Medicine / Facultad de Medicina

Nombre/Name	Curso/ Name of course	Study Area	Is your COIL related to the UN Millenium Goals (sustainable Development Goals)? Which one?	COIL exercise topic	No. of students participating in the COIL
Paula Rivas Calvo	Cardiac rehabilitation practices		No	COIL between my physiotherapy students and foreign nursing students from the same course. Cardiac rehabilitation programs require multidisciplinary work, where the nurse and the physical therapist work hand in hand, and it would be super interesting to know the protocols regarding rehabilitation programs in other countries and especially nursing work, which should be known by part of the physiotherapist (record of constants, protocol of action in the event of cardiac arrest, supervision in cardiac rehabilitation programs, triage ...). I am a nurse and physiotherapist, and when I give this practice to my students they are very interested and learn basic things (general and health culture) also for them from the work of nursing.	20
