

ARCHITECTURE		
Elements of Architecture <i>Elementos de la Arquitectura</i>	Brief Description of the course: Biomimetic Design Methodologies, Computational Design, Digital Manufacturing Preferred language for collaboration: Spanish Professor: Andrés Obregón López	Jan - May 2021
Urban landscaping <i>Paisajismo Urbano</i>	Brief description of the course: Landscape and urban design for the city, sustainability components, streets, squares, parks. Activity Idea: Collaboration in the design of public spaces, can include social studies, city, environmental, squares, urban situations, etc. Preferred language for collaboration: Spanish / English Professor: Jorge Galván Salinas	Jan - May 2021
Elements of Architecture <i>Elementos de la Arquitectura</i>	Brief description of the course: It is a course where ephemeral pavilions are designed, modeled and designed using the analysis of some living being as a basis, later these pavilions are built on a 1: 1 scale. Topic of interest for collaboration: 3D modeling, digital fabrication, parametric design. Preferred language for collaboration: Spanish Professor: Salvador Amaro Rosas	Jan - May 2021
Composición y diseño	Basic Design Studio for Architects Preferred language for collaboration: Spanish, English, Italian Professor: Sindy Melissa Godínez de León	Jan - May 2021
Elements of Architecture <i>Elementos de la Arquitectura</i>	Tridimensional Design for Architects Preferred language for collaboration: Spanish, English, Italian Professor: Sindy Melissa Godínez de León	Jan - May 2021
DESIGN		
Digital tools for design <i>Herramientas digitales para diseño</i>	Brief description of the course: The course is completely practical, the tools of Adobe Illustrator, Photoshop and InDesign are taught. It is open for multiple careers, not only graphic design, but all design majors, as well as communications. Preferred language for collaboration: English Professor: Benigno Peña Ramos	Jan - May 2021
Industrial design studio for 6th and 7th semester <i>Estudio de diseño industrial</i>	Brief description of the course: The Industrial Design Studies from the 5th semester onwards are courses of 3 weekly frequencies where the student applies what they have learned in all previous subjects, in designing solutions to different needs and objectives. The result can be manufacturable, conceptual products and also service design. Topic of interest for collaboration: Product design. Speculative design. Service Design. Activity Idea: Product design applied to new domestic scenarios. Preferred language for collaboration: English or Spanish Professor: Patricio Ortiz Silva	Jan - May 2021
Materials and forms <i>Materiales y formas</i>	Brief description of the course: A course of innovation in packaging materials. Creation of packaging for products, we also see inclusion in packaging, seniors, ecological, etc. Preferred language for collaboration: Spanish Professor: Ma. Elena Franco Caballero	Jan - May 2021
ENGINEERING		
Lean Manufacturing <i>Manufactura Esbelta</i>	Brief description of the course: Practical-theoretical course where students learn the management principles of Lean Manufacturing and its tools: students have to apply all this in a real project in a company (without restriction of size or segment) that they develop as a team during the semester. Project Idea: The course project would be carried out in plants in different locations, with mixed teams. We would take advantage of digital resources (videos, 360° photos, AR, videoconferences) to be able to collaborate remotely in solving real problems in both countries, using lean manufacturing principles and tools. Preferred language for collaboration: Spanish or English Professor: Francisco Alberto Tamayo Enriquez	Jan - May 2021
Tribology <i>Tribología</i>	Brief description of the course: To know the lubrication, friction and wear phenomena. To know how to investigate the tribological properties of diverse materials and how to select materials for certain operative conditions. Preferred language for collaboration: English Professor: Demófilo Maldonado Cortés	Jan - May 2021

BUSINESS		
Microeconomy <i>Microeconomía</i>	<p>Brief description of the course: It is a consumer theory course taught in the Economics degree. The course provides a theoretical and analytical tool (comparative statics) to analyze how consumer decisions change when there are variations in certain factors, as well as in different contexts of risk or uncertainty.</p> <p>Preferred language for collaboration: Spanish or English</p> <p>Professor: Rosa María Morales Valera</p>	Jan - May 2021
Financial Marketing <i>Mercadotecnia Financiera</i>	<p>Brief description of the course: We use different tools offered by finance and management accounting to strategically manage marketing activities</p> <p>Topic of interest for collaboration: Decision-making to choose sales and marketing strategies</p> <p>Preferred language for collaboration: Spanish</p> <p>Professor: Virginia Saldivar Rendón</p>	Aug - Nov 2021
Administrative fundamentals <i>Fundamentos administrativos</i>	<p>The basic aspects of the administrative process.</p> <p>Topic of interest for collaboration: Human Capital Process and Motivation Theories</p> <p>Preferred language for collaboration: Spanish</p> <p>Professor: Alejandro Ríos Hernández</p>	Aug - Nov 2021
SUSTAINABILITY		
Environmental impact and solutions <i>Impacto ambiental y soluciones</i>	<p>Know the impact of our actions on sustainability and possible solutions</p> <p>Preferred language for collaboration: Spanish</p> <p>Professor: Carlos López</p>	Jan - May 2021
INFORMATION SCIENCES		
Visual Culture <i>Cultura visual</i>	<p>We review the way in which culture has historically affected the way of encoding and decoding visual language.</p> <p>Preferred language for collaboration: Spanish or English</p> <p>Professor: José Alfonso Guevara</p>	Jan - May 2021
Creativity <i>Creatividad</i>	<p>In this class we review the theoretical positions on creativity, as well as strategies and exercises to promote creativity.</p> <p>Preferred language for collaboration: Spanish or English</p> <p>Professor: José Alfonso Guevara</p>	Jan - May 2021
SOCIAL SCIENCES		
Introduction to International Relationships <i>Introducción a las Relaciones Internacionales</i>	<p>Know the basic concepts of the discipline of international relations and the international system.</p> <p>Preferred language for collaboration: Spanish or English</p> <p>Professor: Victor Edgar Sánchez Gallegos</p>	Jan - May 2021
Asian Society and Culture <i>Sociedad y Cultura de Asia</i>	<p>Introduce the student to the study of the people and cultures of South, Southeast and East Asia.</p> <p>Preferred language for collaboration: Spanish or English</p> <p>Professor: Victor Edgar Sánchez Gallegos</p>	Jan - May 2021
INTERCULTURAL EDUCATION		
Intercultural Competences	<p>Brief description of the course: Understand the world's diversity in terms of values, beliefs, ideas and points of view. Understand the non-universality of culture, religion and values. Identify the skills and limits to manage adequately intercultural encounters.</p> <p>Preferred language for collaboration: English or Spanish</p> <p>Professor: Berenice Herrera</p>	Jan - May 2021
EDUCATION		
Design and Development of Teaching Materials <i>Diseño y Elaboración de Materiales Didácticos</i>	<p>Brief description of the course: Design, elaborate and implement didactic material in educational programs of formal, non-formal, special education and with adults.</p> <p>Preferred language for collaboration: Spanish or English</p> <p>Professor: Daniela Alejandra Sedas Ruiz</p>	Jan - May 2021
NUTRITION		
Diet Therapy IV <i>Dietoterapia IV</i>	<p>Brief description of the course: Clinical nutrition focused on diseases of the immune system, respiratory and sepsis.</p> <p>Topic of interest for collaboration: Clinical cases and nutritional diagnosis</p> <p>Preferred language for collaboration: Spanish or English</p> <p>Professor: Nancy Adriana Celestino Buentello</p>	Jan - May 2021

MEDICINE

Embriology <i>Embriología</i>	Brief description of the course: The embryology course aims to describe the development of the different body systems, it is anatomy of human development in utero. Topic of Interest for collaboration: Development of the nervous system, anencephaly Preferred language for collaboration: Spanish Professor: María GUadalupe Treviño Alanis	Jan - May 2021
----------------------------------	--	-------------------

PSYCHOLOGY

Assessment and Treatment of Personality Disorders <i>Evaluación y Tratamiento de los Trastornos de la Personalidad</i>	Brief description of the course: Know and study the personality disorders, their evaluation and treatment. Preferred language for collaboration: Spanish Professor: Hermelinda Leal Treviño	Jan - May 2021
